DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Shahpar Shahpar (Reg. No. 45,875) on September 16, 2004.

The application has been amended as follows: for over come the references cited.

Cancel claims 15-24 without prejudice.

Allowable Subject Matter

2. Claims 6-14 are allowed.

The following is an examiner's statement of reasons for allowance: the references cited disclose a circuit integration module for insertion into an avionic cabinet comprising first and second circuit boards, a face plate, a connector assembly, and some other claimed invention, for example, Ruby, Jr. et al. (U.S. Patent 4,836,789) discloses a plurality of modules (18) inserted into a black box (10), each module having a face plate and a connector (20) opposite from the face plate, see figure 1, Harris (U.S. Patent 5,339,362) discloses component cards (72) inserted into a cabinet (12), see

figure 2, each of card having a face plate. However, they do not disclose or render obvious in combination of the face plate coupled to each of the first and second circuit boards, and the connector assembly coupled to each of the circuit boards opposite the face plate. There is no suggestion to modify the references to include these limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Damerow et al., Laut, Dimmick et al., Hill et al., Nicolici et al., Kwa, and Creely, III et al. disclose related art.
